What is the Dolphin Research Center Training Institute?

The DRC Training Institute was established by Dolphin Research Center (DRC) in 2012 in response to the limited availability of licensed professional educational programs that prepare individuals for careers regarding the behavior, care and training of marine mammals. Currently the DRCTI offers an Occupational Associate's degree in Marine Mammal Behavior, Care and Training with the intention of expanding and offering other degrees within the field of marine mammal professions.

Licensed by the Florida Commission for Independent Education, License No. 4766

Program Length

- August – May (36 weeks)
- Demanding immersion program
- Up to 60 hours per week
- Days, evenings, weekends, holidays

Program Clock Hours

- 1680 hours (not including study time)
- 85% Hands on experience

What type of Degree is offered?

Students who complete the program will earn an **Occupational Associate's Degree* in Marine Mammal Behavior Care & Training (MMBCT)**.

This will allow students to gain the practical knowledge and skills to:

- Successfully assess marine mammal behavior
- Adeptly provide appropriate husbandry care
- Apply positive training techniques for the well being and enrichment of marine mammals in human care

Additionally, students will learn a variety of presentation techniques to be an informative, flexible and motivating educator/speaker to a wide range of audiences. They will also gain important critical thinking and communication skills that will prepare them to work in any environment as a cooperative, supportive team player.

Graduates will also be prepared to seek positions as experienced marine mammal trainers at facilities that house or display cetaceans and/or pinnipeds.

****Please note that an Occupational Associates Degree is a terminal degree and credits may not be transferable to other institutions.***

Hands on and Classroom training

Students will be trained in both class room and hands-on lab settings by experienced marine mammal care specialists.

They will also learn to conduct interactive dock programs between dolphins and people in a safe, educational and enjoyable manner.
